

# PREPARE THE DATASET

We must prepare the data after you load it.

- Prepare calculations for the fields for the year, month, and day, as well as the associated navigation path.
- Create some additional calculations, like target sales, minimum sales, maximum sales, and middle range sales.

The screenshot shows the Power BI Desktop interface with the 'Grid' view selected. The 'Data module' pane on the left shows the 'Global\_Superstore2.csv' data source. The main area displays a table of data with the following columns: Row Id, Row ID, Order ID, Order Date, Ship Date, and Ship. The 'Order Date' field is highlighted in the field list.

Row Id	Row ID	Order ID	Order Date	Ship Date	Ship
1	32298	CA-2012-124891	2012-07-31	2012-07-31	Se
2	26341	IN-2013-77878	2013-02-05	2013-02-07	Se
3	25330	IN-2013-71249	2013-10-17	2013-10-18	Fi
4	13524	ES-2013-1579342	2013-01-28	2013-01-30	Fi
5	47221	SG-2013-4320	2013-11-05	2013-11-06	Se
6	22732	IN-2013-42360	2013-06-28	2013-07-01	Se
7	30570	IN-2011-81826	2011-11-07	2011-11-09	Fi
8	31192	IN-2012-86369	2012-04-14	2012-04-18	St
